SUMMARY

I build scalable web applications with Next.js, TypeScript, and Supabase. I have hands-on experience with SaaS apps, authentication, Stripe payments, and serverless functions. My focus is on clean code, reliable deployments, and seamless user experiences.

TECHNICAL SKILLS

Programming Languages: TypeScript, JavaScript, Ruby, PHP

Frontend Technologies: React.js, Next.js, Vite, Tailwind CSS

Backend & Serverless: Node.js, Express.js, Supabase Edge Functions

Databases: PostgreSQL, Supabase (Auth, Storage), MongoDB

Cloud & DevOps: AWS, Google Cloud, Kubernetes, Docker, CI/CD,

Payments & Integrations: Stripe, Stripe Connect, Clerk Authentication

PROFESSIONAL PROJECTS

Edarasa - Enterprise Learning Management SaaS

Implemented *scalable architecture using Supabase* (PostgreSQL, Edge Functions, Storage).

Integrated secure authentication with Clerk.

Set up *Stripe subscriptions* and *automated enrollment* using *Stripe Connect*

Developed comprehensive features including:

- Course management system
- ***Subscription billing and payment management***
- Secure user authentication and onboarding
- File storage and delivery with Supabase Storage
- Responsive, modern frontend with Tailwind CSS and Shadcn UI

WHY HIRE ME

I have debugged and fixed Supabase and Stripe flows before, including CORS errors, function failures, and onboarding bugs. I focus on quick troubleshooting and clear communication, ensuring your app works smoothly from end to end.
